How have changes in learning spaces impacted on learner engagement and wellbeing?

How do the Learning Advisors’ beliefs about learning spaces drive their practice and impact on children’s wellbeing and engagement at BANB7?

RESULTS & DISCUSSION

How do changes in learning spaces impact on learner engagement and wellbeing?

How do the Learning Advisors beliefs about learning spaces drive their practice and impact on children’s wellbeing and engagement at BANB7?

The Hundred Languages At the core of being, children possess a hundred languages, a hundred ways of experiencing themselves, of understanding and encountering others, with a way for thinking that creates connections between the various dimensions of experience rather than separating them.

RESEARCH DESIGN

Half of the Professionals Learning Day in Term 4 2013, was spent working through a process with staff to look at learning environments for children. The Focus Team facilitated these groups which evolved the research into the mainstream. The impact was seen on the first day of school 2013 in how children welcomed and explored their learning.

CONCLUSIONS

The anecdotal evidence and discussions around the impact of the asthenia of spaces on wellbeing and learning continues and goes deeper. The most interesting observations was in the beginning when the older children’s ‘behaviour’ initially increased when the environment was giving them. For many educators their pedagogy is becoming more...
